Preventive measures

for passengers arriving from countries where the new Coronavirus COVID-19 poses a threat

Before and during the flight

Pre-screening of all passengers before boarding the plane

The provision of medical masks and hand sanitizer inside the plane

The usage of masks and medical latex gloves by the aircrew

Upon arrival

Training of the flight crews on how to deal with suspected cases during the flight using decontamination tools, perform isolation procedures and provide the necessary reports upon the aircraft arrival

The passage of all passengers through the **health checkup area** and through the mandatory thermal camera equipment path in for the safety of all travelers

After all the passengers disembark, the **plane** shall be sterilized and disinfected

Sterilization and disinfection of all airport facilities

The presence of health practitioners and medical teams in all of the Kingdom's airports to take the necessary precautions

When a suspected case is detected, **a safe path** for transferring the case is then activated
