Electronic Fuel Oil Non-Availability Disclosure Portal (FOND) Instructions

On June 26, 2012, the U.S. Environmental Protection Agency (EPA) issued an Interim Guidance on the Non-Availability of Compliant Fuel Oil for the North American Emission Control Area (ECA). The Interim Guidance clarifies how the U.S. Government will implement the fuel oil availability provisions contained in Regulation 18 of the International Convention for the Prevention of Pollution from Ships (MARPOL), Annex VI, and describes how an owner or operator of a vessel who cannot obtain compliant fuel oil can make a fuel oil non-availability claim through submission of a Fuel Oil Non-Availability Report (FONAR). The Interim Guidance also indicated that the EPA was in the process of implementing an electronic system to receive the FONARs. The EPA has now launched this system, the Fuel Oil Non-Availability Disclosure Portal (FOND). Persons wishing to submit FONARs to the EPA must now request an electronic FONAR form through FOND, and must submit completed FONARs through this same electronic portal.

This document provides instruction on how to register with and use the FOND portal for any party wishing to submit a FONAR to disclose potential violations of the North American Emission Control Area under MARPOL Annex VI, Regulation 18.

Additional Comments

Once the FONAR has been submitted, the vessel should proceed in its normal course and does not need to wait for further confirmation from EPA prior to entering the North American ECA.

In due course, the EPA will review the complete FONAR submitted by the user and will decide on the appropriate action to take, including taking no action.

The EPA may contact the submitter (and/or ship owner or operator) in the event of an incomplete submission, a request for additional information, or to pursue an enforcement action such as a Notice of Violation.

The ship owner or operator is required to maintain records of this submission for a period no less than 5 years from the occurrence of the violation.
