Marine Air Pollutant ECA in PRC

December 2018

The China Classification Society ('CCS') has provided us with a technical note on the Ministry of Transport of China's Implementation Plan for Marine Air Pollutant Emission Control Areas. The technical note covers the following:

- » Interpretation of Implementation Plan on Marine Air Pollutant Emission Control Areas
- » Types, safety impacts and control measures of compliant fuel oils
- » Marine SO_x emission control solutions and rule systems
- » Latest technical information of implementing 0.50% low sulphur fuel oil standard
- » List of relevant documents (attachments or download links)
- » Reference documents published by relevant international organizations and download links
- » Subsequent suggestions and technical services provided by CCS

The technical note [can be read here](#).
