UKRAINE - Update on ballast segregation

May 2019

In recent years, inspections by State Ecologists in the Ukraine have created a climate of uncertainty and difficulty for many shipowners. Club correspondents CIS Pandi of Odessa have updated us with news that inspections of vessel's segregated ballast tanks will be cancelled and inspections of segregated ballast by state ecologists will be prohibited. These new regulations will come into force after the official publishing in Ukrainian Government bulletins and we will report again when this date is known.

Further details can be read in the newsletters from [CIS Pandi](#) and [ANK Law Office](#) and we thank them for providing this information.
