COVID-19

ECQ strict lockdown
6th to 20th August
2021

Philippines, Manila and other areas to go into strict Enhanced Community Quarantine 6th to 20th August 2021

Due to the increase of the Delta variant of COVID then the Philippine IATF (Inter Agency Task Force) has elevated Manila back to ECQ. Below is an update how this will affect seafarers and the courts;

Crew Changes in Manila and other hubs

Upon checking with the BOQ (Bureau Of Quarantine), we are informed crew change in the region is still allowed and other crew change hubs in the country. It is expected the BOQ and other concerned port authorities will be more strict in implementing the health and safety protocols. The challenges that may be encountered are limited flights /cancellation of flights and travel restrictions as well as stringent quarantine protocols to be implemented by LGUs (Local Government Units) of the different provinces where the crew change hubs (other than Manila port) are located.

The vessels coming from or have rendered port call/s in the following countries: India, Oman, UAE, Bangladesh, Pakistan, Sri Lanka, Indonesia, Thailand, Malaysia and Nepal, within (or for the last) 14 days immediately preceding arrival in the Philippines, are temporarily restricted from disembarking their seafarers. For medical evacuation, this is subject to BOQ's approval. Another challenge here is finding a hospital that can accommodate the seafarers who are suspected to be suffering from delta variant covid 19 (hospitals would normally ask first if the patient came to one of the flagged countries) as most of private hospitals recently said that they are still not prepared /full equipped to accommodate patients suffering from said covid variant.
