

Cyber risk management and incident response service for SteamshipCyber clients

Risk Management Services

What if you could minimize the potential impact from a cyber incident by taking steps to be prepared? Through the Club's reinsurers, AXIS, you have complimentary access to specially designed cyber risk management services to help you prepare.

cybACADEMY

Cyber criminals can regard staff and crew members as the 'weakest link' as they can accidentally or deliberately introduce cyber risks to your business and critical assets.

To help reduce this risk, you have access to the first GCHQ accredited Maritime Cyber Security Awareness education course, which focuses on increasing staff awareness of cyber threats.

This highly engaging e-learning and continuous professional development solution is aimed at all computer users in your business including seafarers and land staff. Your staff and crew will learn the benefits of reporting all cyber incidents.

As well as 10 essential steps to maritime cyber security, the course learning includes:

- Cyber threat
- Phishing
- Surfing the web
- Malware
- Insider threat
